SUMMARY

DevOps Engineer with 4 years in financial services, running **198 self-hosted services** on **10+ Docker Swarm and Kubernetes nodes** (132 CPU cores, 300+ GB RAM) at **99.9%+ uptime** across dev, staging and production. Also builds Go backends (Gin, chi, sqlc, PostgreSQL).

EXPERIENCE

DevOps Engineer January 2025 - Present
Isatis Pooya (financial services group, ~500 employees) | [City], Iran | On-site

- Operate **198 self-hosted services** on **10+ nodes** (Swarm, Kubernetes, internal servers, VPS; 132 CPU cores, 300+ GB RAM) across dev, staging and production at **99%+ uptime**, in a 3-person infrastructure team.
- Run the developer platform for **13 engineers**: GitLab, GitLab CI/CD, Harbor, MinIO, RabbitMQ, Traefik and Prometheus/Grafana on NFS storage.
- Cut GitLab CI build-and-deploy time from **10 min to under 3 min** by localizing pipeline dependencies, managing build caches and controlling runner internet access.
- Built a **5-node PostgreSQL HA cluster** (Patroni, etcd, PgBouncer, streaming replication) with automatic failover and connection pooling for 5 services; failover in 1-2s.
- Deployed a **5-node Redis Sentinel** cluster on Docker Swarm with automatic failover for **5+ production services**; open-sourced the stack on GitHub.
- Re-architected mailcow from a monolithic container stack into Docker Swarm services behind Traefik, serving **5 domains and 115+ mailboxes**.
- Leading the Docker Swarm to **RKE2 Kubernetes** migration: 112 of 198 services moved .
- Resolved [N]+ production incidents (upstream internet outages, IP conflicts, build-cache failures, overloaded nodes), with typical recovery.
- Replaced paid SaaS with self-hosted tools such as Rocket.Chat, Jira , Nexus, ...; automated routine operations with GitLab CI and GitOps, saving 15 hours/week.

Frontend Developer April 2024 - December 2024
Isatis Pooya (financial services group, ~500 employees) | Iran

- Developed the frontend for the centralized automation platform at **my.isatispooya.com**, bringing office correspondence, personnel attendance, investment workflows and other internal modules into one system.
- Delivered the frontend for a **crowdfunding platform** supporting collective fundraising.
- Built the frontend for a **multi-tenant website platform** that currently brings together **20 sites**, with capacity to expand to additional sites.

PROJECTS

ARK | Multi-source backup orchestrator in Go | sadot.dev/projects/ark

- Built a Go orchestrator for **PostgreSQL, MongoDB, Redis, MySQL and MariaDB**, Linux files and Docker volumes, with streaming backups to local, SFTP and S3 storage and **SHA-256 read-back verification**.
- Implemented a PostgreSQL catalog/job queue, independent replication, safe retention, lease-fenced recovery, encrypted credentials and RBAC; added verified PostgreSQL restores and automatic restore policies.

Avent | Integrated e-commerce and accounting ERP | sadot.dev/projects/avent

- Built integrated Go commerce/accounting services (Gin, chi, sqlc, PostgreSQL, Redis, MinIO): **paid shop orders automatically create ERP invoices and journal entries**, with idempotent order IDs preventing duplicate invoices.

Company Infrastructure | GitOps-style automation and IaC | sadot.dev/projects/gitops-infrastructure

- Built company-wide infrastructure with **Ansible, Docker Swarm and GitLab CI**: versioned deployments, Traefik/TLS, registries, databases, storage and Prometheus/Grafana; extending automation to **RKE2 and Helm**.

SKILLS

Containers & orchestration: Docker, Docker Compose, Docker Swarm, Kubernetes (RKE2)
CI/CD & GitOps: GitLab CI/CD, GitLab, Harbor, GitOps workflows
Databases & messaging: PostgreSQL (Patroni, etcd, PgBouncer, replication), Redis (Sentinel), RabbitMQ, MinIO
Networking & edge: Traefik, Nginx, Cloudflare, ArvanCloud
Observability & systems: Prometheus, Grafana, Linux (Ubuntu), NFS, mailcow, Rocket.Chat
Backend: Go (Gin, chi, sqlc, pgx, GORM), REST APIs, OpenAPI/Swagger, SQL, Bash

EDUCATION

B.Sc. Computer Science, Yazd University, Yazd, Iran 2024

LANGUAGES

Persian (Native) | English (Professional working proficiency)
